OPERATING
&
FILTER REPLACEMENT
DIRECTIONS
TO BEGIN USING YOUR AIRPURA

Inspect the exterior of your Airpura to verify there is no damage from shipping. If any damage is noted, please follow the instructions from the distributor returns policy.

Wipe the unit with a damp cloth to remove any dust from packaging.

Plug the unit into a regular grounded 110 volt outlet.

Turn on the unit to MAX and allow it to run for a few minutes.

Set the variable speed control to the level you wish.

The most efficient way to use your Airpura for regular air quality maintenance is to run it at a low speed 24 hours a day 7 days a week.

Maintain a humidity level of below 40% at all times in your home.

FILTER MAINTENANCE AND REPLACEMENT

Ensure regular maintenance/replacement of filters.

The Prefilter

Can be vacuumed from the exterior of the unit once a month or more often. Should be replaced at least after 12 months of use.

To vacuum the Prefilter

Use the brush attachment on your vacuum cleaner. Vacuum slowly around the mesh surface of the filter chamber.

IMPORTANT SAFETY NOTE

Please ensure air purifier is turned OFF when plugging into a power source. Failure to do so may result in motor potentially stalling and/or burning.

Replacing the UV bulb

Open the filter chamber following the instructions.

Pull the bulb upward out of the connector.

Push the replacement bulb firmly into the connector.

Close the filter chamber following instructions.
Technical specifications

Tobacco smoke odor, and chemical control
18 lbs activated Carbon
13\"H x 13.25\"OD x 7.5\"ID

Carbon bed
2\" deep

Particle removal
40 sq ft true HEPA
(Measured 1 side only)
12 pleats per inch
Pleats warm rolled with separators

Air Flow 560 cfm
More cfm than any other home unit available

Housing
Powder coat steel

Size
23 in x 15 in

Weight
45 lbs total

Watts
120 on high / 40 on low

Sound Level
28.1 db on low (at 6 feet)
62.3 db on high (560 cfm)
(Room level 25.1 db)

ETL Certified
Conforms to CSA C22.2
no 113 ANSI / UL 507

To open the filter chamber

1. **Turn over the Airpura**
2. **Remove the 4 retaining screws**
3. **Take off the cover**
4. **Remove the gasket**
5. **Position the Prefilter inside the filter chamber**
6. **Place a felt gasket at the bottom of the filter chamber**
7. **Unfold the filter slider** (Supplied with replacement filters or on request Part#6F001)
8. **Roll it into a spiral**
9. **Insert the tube into the filter chamber inside the Prefilter**
10. **Let the spiral open to fill the opening**
11. **Open the top of the spiral to make a slight funnel**
12. **Insert the Carbon canister into the funnel and hold it straight**
13. **Let the canister slide down the filter slider**
14. **Pull the filter slider up out of the cavity using both hands and let the canister slide to the bottom of the cavity**
15. **Remove the filter slider and fold it for further use**
16. **Slide in the Hepa filter**

To close the filter chamber

1. **Replace the gasket**
2. **Position the indentation in the cover into the center of the HEPA filter**
3. **Replace the 4 screws and tighten**
4. **Turn the Airpura back on casters**
