Setting up your Smart Fireplace

In order to control your new fireplace via Alexa voice commands, you must connect the fireplace to your wireless network (WiFi) and then link the fireplace to your Amazon account.

To set up your smart fireplace, you will need:

- · Smartphone or tablet with WiFi and a web browser, such as Safari or Chrome
- · Your WiFi network settings
- Amazon account and login information
- · Amazon Alexa app, installed on your smartphone or tablet

1) Connect your phone to the fireplace WiFi

Open your phone's WiFi settings. You will see the fireplace network as **SEI-XXXX** Select this SEI Network and enter the password: **seiadmin**

In a few seconds, your phone should be connected to the fireplace WiFi.

Open your phone's

After a few seconds, you

4) Name your fireplace and enable the Alexa skill

Choose a name for your fireplace. This is how you will identify the device when using Alexa voice commands.

Configure the Alexa skill by tapping the link to launch the Alexa app.

You will be prompted to enable the Alexa skill. Tap Enable to Use.

5) Link the Alexa skill to your Amazon account

Login with the same Amazon account that you used to set up the fireplace. Once you have logged in with your Amazon account, close the window to begin the device discovery process. Alexa should find 5 devices – these are the different functions of your fireplace.
